

# ELT525T Dampening Material Kit Installation Guide

Congratulations! You are now on your way to unlocking the potential in your speakers. We have provided everything you need to improve the sound of your ELT525T speaker. Please inspect the contents of your kit for the following: items:

## ALL BLOCKS SHOULD BE LABELED

- |             |             |
|-------------|-------------|
| 1. 2 pieces | 5. 4 pieces |
| 2. 4 pieces | 6. 2 pieces |
| 3. 4 pieces | 7. 2 pieces |
| 4. 4 pieces | 8. 2 pieces |
- & 2 silver speaker labels

### A few tips...

1. Installation will be much easier if you de-solder the woofer, tweeter & binding posts.
2. If you are installing an upgraded crossover from Skiing Ninja, follow the instructions for installing the new crossover boards before continuing with this installation. See diagram 1.1 of the following page for correct placement of your new crossover network boards. After your new boards are installed you are ready to continue installing the NoRez.
3. Save a scrap of the removed dampening material to use to cover the crossover after you have reinstalled everything.
4. Before you take off the backing of any piece, do a dry run of all the pieces to see how they fit. Due to manufacture variations some trimming may need to be done. A strong pair of scissors or a box cutter works well.
5. Cut the sections out of the #3 pieces for the back wall using a strong pair of scissors or a box cutter.
6. The adhesive on the NoRez is pressure sensitive so press firmly all over the piece.
7. Reconnect the wiring after all the NoRez has been attached.
